

IB Psychology SL Summer Assignment

Directions:

1. Sign into the inthinking classroom in the link provided:
<https://www.student.thinkib.net/group/DKLNx89>
YOU MUST USE YOUR SCHOOL EMAIL
2. Read through the following sections in the Psychology Textbook Tab in In Thinking, and develop notes on a separate sheet of paper:

Research in Psychology; Introducing Psychology, fundamentals of research, ethics in research, discussing research, quantitative research methods, qualitative research methods, questionnaires and surveys
Biological Approach; The brain and behavior, hormones, genetics and behavior
3. Complete ALL ATL activities on separate sheets of paper and staple them together as a packet
4. When you return to school, you will have an open notes Google Form quiz based on the reading and applying what you learned.

Guided Reading: Make sure that you take notes on the following:

- Key terms and theories
- Application of methodology terms and why they are important in experiments
- Studies (should include the Aim, Procedure, Results, Conclusions, and Evaluation or APRCE)
- Examples of questions or test materials
- Critical thinking—information that explains the connections between the studies and the theories
