

IB SL Environmental Systems & Societies Summer Assignments

Instructor: Mrs. Folgate Carey Email: laurieAF@leeschools.net

1. Download the ESS Syllabus Guide2017(I will post a copy of this in our Google Classroom, code [bbggmpz](#)) and read through.
2. Refer to pp. 20-21 which is the course outline of the 8 topics covered in the course. Find a current event article that relates to each of the 8 course topics and write a brief reflection as to how each of the 8 articles related to each of the 8 IB topics.
3. Read pp. 74-89 to become familiar with the external and internal course assessments. Develop 3 testable research questions that correlate to 3 of the 8 IB topics that you would be interested in investigating as your Internal Assessment by completing the Developing your RQ from an EI(Environmental Issue) assignment also posted in the Google Classroom.
4. Refer to pp. 90-91 to create flashcards for each of the 33 command verbs. This will allow you to more effectively respond to exam items.
5. You will be quizzed on your completion of items 2-4 above when you return for the 2023-2024 academic year.
